This product makes an electromagnetic field while it operates. This field may under some conditions interfere with active or passive medical implants. To decrease the risk of conditions that can possibly injure or kill, we recommend persons with medical implants to speak with their physician and the

medical implant manufacturer before you operate the product.

Check the watering control housing for damages before usage. Don't use a damaged watering control. Please regularly check the connecting line. A damaged watering control should not be used. In the event of damage, have the aquaBloom checked by GARDENA Service. For the watering system, use only rechargeable 1.2 V AA NiMH batteries. Different types of batteries or new and used batteries are not to be mixed.

Personal safety

DANGER! Risk of suffocation!

Small parts can be easily swallowed. There is also a risk that the polybag can suffocate toddlers. Keep toddlers away when you assemble the product.

Only use Original GARDENA parts, as the function of the system cannot otherwise be guaranteed. Do not touch the watering control in strong sunshine. Only use the watering system outdoors. Do not use the product while you are tired or under the influence of drugs, alcohol or medication. The product must not be connected directly to the faucet.

CAUTION!

If the required container exceeds 100 litres, you must observe the max. weight load of your balcony (according to DIN 1055).

2. INITIAL OPERATION → (Fig. 1–6)

A video of the setting processes is available here:

Fig. 3: Place the water control in a sunny place and avoid shaded areas. When using the aquaBloom for the first time, place it in the sun for 8 hours with the rotary knob turned to “OFF” or charge the rechargeable batteries separately.

3. FUNCTION → (Fig. 7)

After setting the watering duration and frequency, the LED will blink twice to confirm the desired program. The first watering operation will start. This will be the future watering start time which will remain unchanged even if the watering duration/frequency are changed. The watering start time can be reset by switching to “OFF”.

The LED colour indicates the current battery charge status:

- Green = Ready for watering.
- Orange = Ready for watering. Place the aquaBloom in a sunny spot or charge the batteries with an appropriate battery charger, if no sunshine is expected during your absence.
- Red = Watering not possible anymore. It is necessary to place the aquaBloom in direct sunlight or recharge the batteries separately.
