

PUCK

PUCK is a new integrated concept from in-lite that is available in two formats: PUCK has a diameter of 60 mm, while PUCK 22 has a diameter of 22 mm. These fixtures are the perfect indication lighting along a driveway, walkway, duckboards or scaffolding. Thanks to

the sideways light output, the lighting can be seen from a distance. PUCK and PUCK 22 are finished with an anodized aluminum cover in dark gray and warm silver.

PUCK

INTEGRATED

PUCK & PUCK DARK
