EVO DOWN DARK 100-230V

The introduction of the new EVO DOWN DARK 100-230V completes the EVO line. Designed specifically to connect to the power supply, this wall light is the perfect finishing touch in any EVO yard. The EVO DOWN DARK can also be used as attractive stand-alone lighting. This stylish wall light is an excellent choice for modern homes and straight outer walls.

All of the products in the EVO line are made of the highest quality materials. The EVO DOWN DARK

100-230V is made of high-quality anodized aluminum. This not only gives it a stylish look & feel, but makes it highly resistant against dirt and weather conditions and, consequently, corrosion-resistant. This architecturally designed wall light is equipped with superior quality LED lights and a diamond-cut lens to ensure an attractive and even distribution of the light. This LED downlighter has a di-use light beam, creating an inviting display of light on straight walls.
