

INTRODUCING
SCOPE CEILING

New in 2019: SCOPE CEILING. This surface light is the 'big brother' of the MINI SCOPE CEILING. The fixture is perfect for overhangs and pergolas where more light or a larger fixture is desired. SCOPE CEILING is very easy to install. Simply screw the base to the surface using two screws and turn the light source using the bayonet catch on the base. SCOPE CEILING comes with the KILLFLASH 2 to ensure that the fixture does produce glare and to create an attractively diffuse lighting effect.
