EVO HYDE 180 DARK

The EVO HYDE 180 DARK allows us to introduce a multi-function surface spotlight that can be used to easily create new lighting effects in the garden. The fixture features a casing made from anodized aluminum. This gives it a stylish appearance and makes it highly resistant against dirt and weather conditions.

All products in the EVO range feature the latest and very best LED's. This means the fixtures are very energy-efficient and help to create very natural colors in your garden. In addition, the

fixtures feature a 'diamond cut' lens which ensures effective and uniform light distribution. The EVO HYDE 180 DARK can be incorporated into staircases, platforms, balustrades, benches and pond elements.

Combine EVO HYDE 180 DARK products with other products in the EVO range and transform your outdoor space into somewhere you enjoy spending time during the day and in the evening.
